

Better enable employee productivity on the Dell Latitude 7300 Business Laptop equipped with an Intel Core i7-8665U processor

We compared the system responsiveness and battery life of the Dell Latitude™ 7300 Business Laptop, powered by an Intel® Core™ i7-8665U processor, to that of the HP EliteBook 735 G6 Notebook PC and the Lenovo® ThinkPad® x395 Laptop, both powered by AMD Ryzen™ 7 PRO 3700U processors.

Whether your organization has multiple offices and a mobile workforce or has employees working from home in response to current events, the Dell Latitude 7300 Business Laptop equipped with an Intel Core i7-8665U processor can help limit disruption and keep everyone productive.
